- **Sports injuries:** musculoskeletal and ligaments
- **e-Technology:** advanced, state-of-the-art digital X-ray imaging; electronic medical records

Our Areas of Expertise

Orthopedics & Sports Medicine

Our orthopedic surgeons were voted by Southeast Michigan healthcare professionals as *Hour Detroit Magazine* TOP DOCS. They are respected and experienced specialists who are experts in the diagnosis and treatment of conditions that affect bones, joints, muscles, cartilage, ligaments, and nerves of the upper and lower extremities. Our physicians also have extensive experience treating athletic injuries, including damage to tendons and the musculoskeletal system. From fracture care to stabilizing joints, patients can rely on the doctors at Mendelson Kornblum to help you return to an active lifestyle.

Back, Neck & Spine

Our spine team is considered authorities on procedures and treatment options for conditions affecting the back. They are also thought of as the area's best surgeons for repair of structural disorders—and have received a TOP DOC honor as a result. To help patients achieve the best results, our specialists encourage a multi-dimensional approach that may include physical therapy, medication, exercise, weight loss, therapeutic injections, and surgery if needed.

Pain Medicine/PM&R

Our interventional pain specialists—who were voted TOP DOCS by their medical peers—excel in the treatment and management of acute/chronic conditions. Knowledgeable in the most effective and proven therapies, our doctors can help patients recover mobility and functionality.

Physical Therapy

Ongoing consultation between our therapists and physicians, as well as frequent progress reviews, helps our patients achieve best results—and often through less painful and more effective methods. Our therapists specialize in orthopedic conditions, and can readily assess and adjust treatment plans if needed—which can also help reduce a patient's time in rehabilitation.
