

Prescription Renewals

Please contact the appropriate office before your medication runs out or your refills expire. Allow for 48 hours notice (two business days) to get approval for your new script.

Dedicated Joint Replacement Programs

We are proud to be affiliated with the centers for joint replacement at St. Mary Mercy Hospital and St. John Macomb-Oakland Hospital. Both are designated as Blue Cross Blue Shield Centers of Distinction for Hip and Knee Replacement. These specialized programs are recognized for their exceptional patient education and care.

Knowledgeable Physician Assistants

Physician Assistants (PAs) are licensed healthcare providers who complete a master's level of medical training. Under a doctor's supervision, they can perform many of the same services as physicians. Our certified PAs are highly-skilled professionals—and an important part of the patient care team. The PAs are involved with all aspects of evaluation and treatment, and also assist in surgery. You can feel confident knowing that they, too, are experts in orthopedic conditions.

Your Satisfaction Is Our Priority

If you have a question, please ask! We want to make sure every patient is happy with the care received. We invite you to provide helpful feedback to any of our staff, and also to complete our patient satisfaction survey.

Planning for Your Appointment

We respect our patients' time and always strive to stay on schedule. Please understand that despite our best efforts, the doctors can at times be unexpectedly delayed due to emergencies or surgical changes. We will let our patients know when this occurs. Also, if you need to reschedule an appointment, please give us at least 48 hours notice if possible.

New Patients

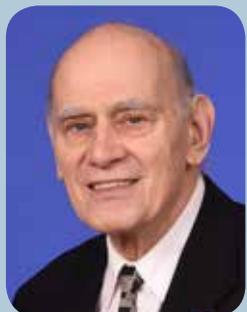

New patients will need to fill out health forms before the first appointment. Forms can be sent by mail or email, or found under Patient Resources at MendelsonOrtho.com. So that we can expedite your visit with the doctor, please give the completed paperwork to the receptionist when you check in for your appointment.

Emergencies

During office hours we will make every effort to quickly get you in to see a doctor for evaluation and treatment. Call our office in Livonia or Warren to speak with our medical staff and be sure to explain the urgent nature of your visit.

Insurance and Billing

Because insurance coverage varies by location and physician, please contact our office as well as your insurance provider to verify your plan. Charges not covered by insurance are the patient's responsibility. If co-pays are due, we accept payment at the time of your office visit. Let our patient support team know in advance if you need to make special arrangements for payment. For billing assistance or if you have any questions about a statement, please call 586.439.6242.

Fellowship Trained

After completing four years of college, four years of medical school, and five years of residency, physicians can apply for a fellowship. A select few elect to complete this in-depth training, spending a year under the guidance and instruction of recognized experts in their chosen field. Many of the surgeons at Mendelson Kornblum are fellowship trained, which means patients can feel confident that they truly are the best in their specialty.

- **Sports injuries:** musculoskeletal and ligaments
- **e-Technology:** advanced, state-of-the-art digital X-ray imaging; electronic medical records

Our Areas of Expertise

Orthopedics & Sports Medicine

Our orthopedic surgeons were voted by Southeast Michigan healthcare professionals as *Hour Detroit Magazine* TOP DOCS. They are respected and experienced specialists who are experts in the diagnosis and treatment of conditions that affect bones, joints, muscles, cartilage, ligaments, and nerves of the upper and lower extremities. Our physicians also have extensive experience treating athletic injuries, including damage to tendons and the musculoskeletal system. From fracture care to stabilizing joints, patients can rely on the doctors at Mendelson Kornblum to help you return to an active lifestyle.

Back, Neck & Spine

Our spine team is considered authorities on procedures and treatment options for conditions affecting the back. They are also thought of as the area's best surgeons for repair of structural disorders—and have received a TOP DOC honor as a result. To help patients achieve the best results, our specialists encourage a multi-dimensional approach that may include physical therapy, medication, exercise, weight loss, therapeutic injections, and surgery if needed.

Pain Medicine/PM&R

Our interventional pain specialists—who were voted TOP DOCS by their medical peers—excel in the treatment and management of acute/chronic conditions. Knowledgeable in the most effective and proven therapies, our doctors can help patients recover mobility and functionality.

Physical Therapy

Ongoing consultation between our therapists and physicians, as well as frequent progress reviews, helps our patients achieve best results—and often through less painful and more effective methods. Our therapists specialize in orthopedic conditions, and can readily assess and adjust treatment plans if needed—which can also help reduce a patient's time in rehabilitation.
